

OFFICE OF PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

www.TAMUT.edu

Dear Mr. Mallette:

As we (rapidly) approach the conclusion of another semester, I would like to take this opportunity to express my appreciation for your efforts at making our NTCC programming successful. This is a valuable partnership for our students and it is the work of folks such as you that makes it possible. It is not always convenient to work at a remote location, whether in person or via distance learning. I regularly hear from NTCC faculty and staff about how impressed they are with the work of our TAMUT at NTCC team and how grateful they are for your efforts. I also hear from our students at NTCC that they are also very grateful for your work.

I hope you have an enjoyable summer planned.

Please contact me if there is anything I can do to make your work at NTCC more successful.

Thank you,

A handwritten signature in blue ink, appearing to read "D. Yells".

David P. Yells, Ph.D.
Provost and Vice President for Academic Affairs

Dear Mr. Mallette:

As your period of performance has come to a close, I wanted to take this opportunity to let you know of the outstanding work you have done in support of our training development efforts in the Counter Explosive Hazard Center.

I would like to specifically recognize your work relating to course and lesson plan development within Sharable Content Object Reference Model (SCORM) compliance and synchronously designing lesson plans for Learning Management System (LMS) interaction capability. Upon beginning the course development, you showed exceptional initiative in immersing yourself in the intricacies of the development of courseware. You established yourself early-on as a knowledgeable, assertive team leader, willing to do "whatever it takes" to make the project a success. Your efforts in researching, developing and coordinating training development and leading the way in creative, immersive lesson plans has been instrumental in establishing the US Army Engineer School, and Counter Explosive Hazard Center's, Countermine/Search (BoobyTrap) distance learning courseware as the standard to which other TRADOC installations should aspire. Your interaction with those with expertise in other directorates, research both in and outside of the schoolhouse and Ft. Leonard Wood, and focused attention on tracking down the most current and relevant information have ensured that the products we are developing will be first-rate. You have displayed fact, professionalism and an outstanding work ethic in every aspect of your performance.

Your leadership, initiative and attention to detail will be missed in the future, as we continue in our implementation efforts. However, your superior performance during your tenure has helped establish a solid foundation and postured our team for success. You are most certainly an asset to any organization and I look forward to any possible future opportunities to work with you on this or other projects.

In closing, the cohesive team that you took lead of for this project is one that has displayed the professionalism and expertise that is in keeping with the highest standards of training and training development.

Sincerely,

Douglas K.D. Merrill

1. I am pleased to forward to you this letter of appreciation from Colonel Wayne A. Mautz, Director, General Support Materiel Department, US Army Air Defense School, Fort Bliss, Texas. Your outstanding achievement in the preparation of the USAADS production, "SAFEGUARD Ballistic Missile Defense System Description," to be used as a briefing audio aid, is commendable. From the comments in the letter, it is evident that your talents as a broadcast specialist assisted immeasurably in the success of the production.

2. You are to be commended for your outstanding performance of duty which resulted in this recognition.

TO: Prospective Employers of David Mallett

Dave's background and education served us in a superior manner in his position as Director of Sound Systems.

Dave's sincere desire and efforts to produce sound quality "second to none" were evidenced in his own and his subordinates' job performance. The product quality improved continuously; quality standards rose steadily; and the coordination/cooperation between his directorate and the editorial directorate (in spite of his having to deal with some abrasive personalities) was excellent.

Cordially,

Stuart V. Forest
President

David is one of the most outstanding students we have ever had in our program at North Texas State University.

I have known David as a student, as an employee, and as a teaching assistant for 2 years. He has continually proven himself to be a mature, intellectual and dedicated individual.

He is often used as a consultant both in the private and public sectors, has several excellent media presentations to his credit and is currently working on three major programs for our university.

David's tremendous involvement in instructional technology would make him a valuable addition to your staff. I wholeheartedly recommend him to you.

TO: Specialist Four David A. Mallett, 431-94-8228

1. During the period July through November 1974, you worked with instructors of the General Support Materiel Department in producing both English and metric versions of a lengthy sound-synchronized-slide presentation entitled, "SAFEGUARD Ballistic Missile Defense System Description." These productions have been incorporated into five programs of instruction here at the Air Defense School and are being used additionally to brief many high-ranking officers and visiting dignitaries.
2. You made many outstanding contributions to this project including selection of appropriate background music, advice on phrasing, and actual recording and mixing of all sound tracks. Your talent as a narrator is especially outstanding and has gained praise from all who have viewed the presentation. I commend you for all these contributions and especially for your ability to handle many difficult and unfamiliar acronyms, abbreviations and technical terms with great finesse.

Dear Sirs

We refer to the successful commissioning of our AV system at the Theatre and Auditorium and wish to take this opportunity to express our appreciation for your kind assistance. We found your technical advice and experience most invaluable in formulating our AV requirements, vetting the specification/tender, and awarding the contract to the right supplier at a competitive price. Our management wishes to thank you for your time and services rendered.

Yours faithfully

To whom it may concern:

As Acting Director, Dave served ably during my illness and absence overseeing an operation staffed with a wide variety of individuals, cultures and religions. In this, as well as in his dealings with high ranking government officials from various ministries, he functioned with dignity and diplomacy.

His extraordinary technical abilities with computers and media production equipment, combined with his keen lateral thinking capabilities, took us from simple single-concept programs to one of the most advanced production capabilities in Southeast Asia. With this equipment, he then applied his creative talents to write and produce "Anthropometry: Use and Application in Medicine." This program was subsequently awarded "Best Training Video" by the National Productivity Board, reflecting great credit on the University.

While I was able to convince Dave to extend his contract for a year, his job here is now complete and Texas calls. We shall miss him and his "chili."

When SFA took over the Sheppard AFB contract October 1, 1978, Mr. Mallett walked into an untidy situation, with obsolete sound equipment, a heavy workload and unhappy customers.

Through diligent work on his part the sound studio has been upgraded, the quality of sound has been vastly improved and the customers on base are complimentary toward SFA's sound work.

SFA has called on Mr. Mallett on some special projects which have required his learning new techniques and inventing others. He has the intelligence to do this sort of thing where many people do not. And most important he is willing.

T. R. Havins
President
